Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, 28, 29, and 33-38, drawn to nucleic acids, vectors, methods of making nucleic acids, host cells, processes for producing polypeptides, and uses of nucleic acids.

Group II, claim(s) 20-22, drawn to antibodies.

Group III, claim(s) 23-27 and 30-32, drawn to polypeptides, uses of polypeptides, and pharmaceuticals containing polypeptides.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There is no single general inventive concept between Group I and Group II because the nucleic acids, vectors and host cells of Group I are materially different from the antibodies of Group II. Likewise, there is no general inventive concept common to Groups I and III because the nucleic acids, vectors and host cells of Group I are materially different from the polypeptides of Group III. None of the products or methods of Group I is needed to produce the antibodies of Group II or the polypeptides of Group III (which polypeptides may be isolated from naturally occurring sources or may be chemically synthesized). The antibodies of Group II do not share a common inventive concept with the polypeptides of Group III, the methods of producing polypeptides being different and distinct from methods for the production and or isolation of polypeptides. Additionally, the claims of Group I-III mention or refer to large numbers of unrelated nucleic acid sequences or unrelated polypeptide sequences. No matter which Group applicants elect, applicant is further required to select one nucleic acid sequence or polypeptide sequence (or in the case of Group II, reference to a single sequence) for examination on the merits (see MPEP 803.04).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
